# GIVEN PROBLEM

## Massage Shop

1. The system shall allow a user to register by specifying the name, telephone number, email, and password.
2. After registration, the user becomes a registered user, and the system shall allow the user to log in to use the system by specifying the email and password. The system shall allow a registered user to log out.
3. After login, the system shall allow the registered user to reserve up to 3 queues by specifying the date and the preferred massage shop. The massage shop list is also provided to the user. A massage shop information includes the name, address, telephone number, and open-close time.
4. The system shall allow the registered user to view his/her massage reservation.
5. The system shall allow the registered user to edit his/her massage reservation.
6. The system shall allow the registered user to delete his/her massage reservation.
7. The system shall allow the admin to view any massage reservation.
8. The system shall allow the admin to edit any massage reservation.
9. The system shall allow the admin to delete any massage reservation.

add phoneNumber  
in models/User

# change schema of Hospital to MassageShop

```
const MassageShopSchema = new mongoose.Schema({  
  
    name: {  
        type: String,  
        required: [true, 'Please add a name'],  
        unique: true,  
        trim: true,  
        maxlength: [50, 'Name can not be more than 50 characters']  
    },  
    address: {  
        type: String,  
        required: [true, 'Please add an address']  
    },  
    priceRange: {  
        type: String,  
        required: [true, 'Please add a price range']  
    },  
    phoneNumber: {  
        type: String  
    },  
    openTime: {  
        type: String,  
        required: [true, 'Please add opening time']  
    },  
    closeTime: {  
        type: String,  
        required: [true, 'Please add closing time']  
    }  
        toJSON: { virtuals: true },  
        toObject: { virtuals: true }  
    });
```

edit schema of  
Appointment into  
Reservation

change ApptDate to  
reservationDate

change hospital to  
massageShop

```
const ReservationSchema = new mongoose.Schema({  
    reservationDate: {  
        type: Date,  
        required: true  
    },  
    user: {  
        type: mongoose.Schema.ObjectId,  
        ref: 'User',  
        required: true  
    },  
    massageShop: {  
        type: mongoose.Schema.ObjectId,  
        ref: 'MassageShop',  
        required: true  
    },  
    createdAt: {  
        type: Date,  
        default: Date.now  
    }  
});
```

insert phoneNumber  
for Register  
user/admin

```
exports.register = async (req, res, next)=> {
    console.log(req.body);

    try {
        const {name, email, phoneNumber, password, role}=req.body;

        //Create user
        const user=await User.create({
            name,
            email,
            phoneNumber,
            password,
            role
        });
        //Create token
        // const token = user.getSignedJwtToken();

        // res.status(200).json({success:true, token});
        sendTokenResponse(user, 200, res);
    } catch (err) {
        res.status(400).json({success:false});
        console.log(err.stack);
    }
}
```

change  
routes/hospitals  
to massageShops

```
const express = require('express');
const {
  getMassageShops,
  getMassageShop,
  createMassageShop,
  updateMassageShop,
  deleteMassageShop
} = require('../controllers/massageShops');

const reservationRouter = require('./reservations');

const router = express.Router();

const { protect, authorize } = require('../middleware/auth');

router.use('/:massageShopId/reservations/', reservationRouter);
router.route('/').get(getMassageShops).post(protect, authorize('admin'),
createMassageShop);
router.route('/:id').get(getMassageShop).put(protect, authorize('admin'),
updateMassageShop).delete(protect, authorize('admin'), deleteMassageShop);

module.exports = router;
```

# change routes/appointments to reservations

```
const express = require('express');
const {
  getReservations,
  getReservation,
  addReservation,
  updateReservation,
  deleteReservation
} = require('../controllers/reservations');

const router = express.Router({ mergeParams: true });

const { protect, authorize } = require('../middleware/auth');

router.route('/')
  .get(protect, getReservations)
  .post(protect, authorize('admin', 'user'), addReservation);

router.route('/:id')
  .get(protect, getReservation)
  .put(protect, authorize('admin', 'user'), updateReservation)
  .delete(protect, authorize('admin', 'user'), deleteReservation);

module.exports = router;
```

change hospitals -> massageShops  
and appointments -> reservations  
in server.js

```
const auth = require('./routes/auth');
const reservations = require('./routes/reservations');
const massageShops = require('./routes/massageShops');

app.use('/api/v1/auth', auth);
app.use('/api/v1/reservations', reservations);
app.use('/api/v1/massageShops', massageShops);
```

add logout in  
controllers/auth.js

```
exports.logout = async (req, res, next) => {
  res.cookie('token', 'none', {
    expires: new Date(Date.now() + 10 * 1000),
    httpOnly: true
  });
  res.status(200).json({
    success: true,
    data: {}
  });
};
```

add logout in  
routes/auth.js

```
const express= require('express');
const {register, login, getMe, logout}=require('../controllers/auth');

const router=express.Router();

const {protect}= require('../middleware/auth');

router.post('/register', register);
router.post('/login', login);
router.get('/me', protect, getMe);
router.get('/logout', logout);

module.exports=router;
```

# WORK DIVISION

The screenshot shows a GitHub repository interface with the following details:

- Repository Path:** 2110503-2564 / project-may-i-scan
- Tab Selection:** Code (highlighted in red)
- Search Bar:** Type / to search
- Header Buttons:** Issues, Pull requests, Actions, Projects, Security, Insights
- Section Title:** Activity
- Filter Options:** All branches, All activity, All users, All time, Showing most recent first
- Activity List:** A list of commits and pushes from various users (AAmyYY, ballggwp, vryw) across different branches (main). The commits are described as follows:
  - editCodeServer (AAmyYY, 26 seconds ago)
  - editCodeComment (AAmyYY, 1 minute ago)
  - Update Testcase demo Additional (ballggwp, 4 minutes ago)
  - Update Demo testcase (ballggwp, 5 minutes ago)
  - slide update (ballggwp, 3 hours ago)
  - edit test demo for additional requirement (vryw, 14 hours ago)
  - edit test demo for additional requirement (vryw, 14 hours ago)
  - rename document (vryw, 15 hours ago)
  - update document (vryw, 15 hours ago)
  - add document (vryw, 15 hours ago)

# WORK DIVISION

add document

 vryw pushed 1 commit to [main](#) • 1b2d6f0...eceb359 • 15 hours ago

...

add test case for massage shop and additional requirements

 vryw pushed 1 commit to [main](#) • a3e6416...1b2d6f0 • 15 hours ago

...

add reviews and create diagram folder

 vryw pushed 1 commit to [main](#) • c721a65...a3e6416 • 3 days ago

...

Massage Shop code

 vryw pushed 1 commit to [main](#) • ea154af...c721a65 • 3 days ago

...

add deadline

 github-classroom[bot] created [main](#) • ea154af • 11 days ago

# ADDITIONAL REQUIREMENT

- Create reviews for massage shop
- Create Models/Review.js
- Create controllers/reviews.js
  - a.getReviews
  - b.getReview
  - c.addReview
  - d.updateReview
  - e.deleteReview
- Create routes/reviews.js
- Add route in server.js

# ADDITIONAL REQUIREMENT
